(a) Dual unitary Schur packet budgets
left exact
left input packets
left output blocks
right exact
right input packets
right output blocks
Hardy magnitude at $r = 0.85$
noise σ
(b) Two absolute-value proof losses
left scalar paths
left RH-57 Riesz
right scalar paths
right RH-57 Riesz
sufficient upper
noise σ
(c) Blocks contract; exact gains stay modest
left max $\|T_j^8\|$
left empirical Stein gain
right max $\|T_j^8\|$
right empirical Stein gain
binary64 diagnostic
noise σ
(d) Right input-packet Gram at $\sigma = 0.01$
Schur packet index
Schur packet index
